4	To be asked after use of app	3

Note: this document is not the final version. It is merely an additional aid for the developers.

1 Introduction

Evaluation of quantitative and qualitative aspects of the Physio Companion app is done through a usability study. This document outlines the testing methodology and concludes with the resulting findings.

The goals of the study are:

- Assess the ease of use of the app across a diverse demographic
- User understanding of the terminology within the app
- User perception of the flow and navigation within the app
- Identification of any friction points
- Feedback on additional and beneficial features within the app

2 Demographics

3 To be asked during use of app

4 To be asked after use of app
