1 Introduction

These are more open-ended questions.

For patients:

Would this be a tool that you use in the recovery process (from a knee injury in this case)?

Can you think of any improvements? (if they say no, probe further? eg. what are their thoughts on UI, pose detection etc)

What did you like about the application?

For PTs: would you use something like this in your practice? Can you think of any improvements? (if they say no, probe further? eg. what are their thoughts on UI, pose detection etc)

What did you like about the application?
